# CONTENTS OF VOLUME 35

## Number 1

| | | |
|---|---|---|
| A. S. SANGANI and W. LU | 1 | Elastic coefficients of composites containing spherical inclusions in a periodic array |
| R. HILL | 23 | Constitutive dual potentials in classical plasticity |
| K. SCHULGASSER | 35 | Thermal expansion of polycrystalline aggregates with texture |
| V. TVERGAARD | 43 | Effect of yield surface curvature and void nucleation on plastic flow localization |
| L. B. FREUND | 61 | The stress intensity factor history due to three-dimensional transient loading on the faces of a crack |
| Y. WEITSMAN | 73 | Stress assisted diffusion in elastic and viscoelastic materials |
| D. E. GRADY and M. E. KIPP | 95 | The growth of unstable thermoplastic shear with application to steady-wave shock compression in solids |
| S. E. JONES and P. P. GILLIS | 121 | On the penetration of semi-infinite targets by long rods |
| Announcements | 133 | |

## Number 2

| | | |
|---|---|---|
| M. BOBETH and G. DIENER | 137 | Static elastic and thermoelastic field fluctuations in multiphase composites |
| A. NEELDEMAN and V. TVERGAARD | 151 | An analysis of ductile rupture modes at a crack tip |
| C. FRESSENGEAS and A. MOLINARI | 185 | Instability and localization of plastic flow in shear at high strain rates |
| K. WALTON | 213 | The effective elastic moduli of a random packing of spheres |
| P. PONTE CASTAÑEDA | 227 | Asymptotic fields in steady crack growth with linear strain-hardening |

**Number 3**

T. W. WRIGHT — 269 — Steady shearing in a viscoplastic solid

K. A. HARTLEY, J. DUFFY and R. H. HAWLEY — 283 — Measurement of the temperature profile during shear band formation in steels deforming at high strain rates

Q. S. NGUYEN — 303 — Bifurcation and post-bifurcation analysis in plasticity and brittle fracture

H. STANG — 325 — A double inclusion model for microcrack arrest in fibre reinforced brittle materials

R. ABEYARATNE and J. K. KNOWLES — 343 — Non-elliptic elastic materials and the modeling of elastic-plastic behavior for finite deformation

G. P. PARRY — 367 — On shear bands in unloaded crystals

**Number 4**

L. R. F. ROSE — 383 — Crack reinforcement by distributed springs

L. ANAND, K. H. KIM and T. G. SHAWKI — 407 — Onset of shear localization in viscoplastic solids

S. AOKI, K. KISHIMOTO, T. YOSHIDA and M. SAKATA — 431 — A finite element study of the near crack tip deformation of a ductile material under mixed mode loading

P. J. BUDDEN — 457 — The stress field near a blunting crack tip under mixed Modes 1 and 2

J. TIROSH and M. SAYIR — 479 — High speed deep drawing of hardening and rate sensitive solids with small interfacial friction

Announcements — 495

**Number 5**

L. J. WALPOLE — 497 — Orthotropically textured elastic aggregates of cubic crystals

A. AGAH-TEHRANI, E. H. LEE, R. L. MALLETT and E. T. ONAT — 519 — The theory of elastic–plastic deformation at finite strain with induced anisotropy modeled as combined isotropic–kinematic hardening

J. T. LEIGHTON, C. R. CHAMPION and L. B. FREUND 541 Asymptotic analysis of steady dynamic crack growth in an elastic–plastic material

R. HILL 565 On a class of constitutive relations for nonlinear infinitesimal elasticity

R. BECKER 577 The effect of porosity distribution on ductile failure

M. HORI and S. NEMAT-NASSER 601 Interacting micro-cracks near the tip in the process zone of a macro-crack

T. MORI and T. MURA 631 Blocking effect of inclusions on grain boundary sliding; spherical grain approximation

N. TRIANTAFYLLIDIS and Y. J. KWON 643 Thickness effects on the stability of thin walled structures

Erratum 675

**Number 6**

T. N. FARRIS, L. M. KEER and R. K. STEELE 677 The effect of service loading on shell growth in rails

T. W. WRIGHT and J. W. WALTER 701 On stress collapse in adiabatic shear bands

J. R. BROCKENBROUGH and S. SURESH 721 Constitutive behavior of a microcracking brittle solid in cyclic compression

P. M. ANDERSON and J. R. RICE 743 The stress field and energy of a three-dimensional dislocation loop at a crack tip

W. J. DRUGAN and Y. SHEN 771 Restrictions on dynamically propagating surfaces of strong discontinuity in elastic–plastic solids

Announcement 789
